

THE
PHILOSOPHICAL MAGAZINE

EDITOR

PROFESSOR N. F. MOTT, M.A., D.Sc., F.R.S.

EDITORIAL BOARD

SIR LAWRENCE BRAGG, O.B.E., M.C., M.A., D.Sc., F.R.S.

SIR GEORGE THOMSON, M.A., D.Sc., F.R.S.

PROFESSOR A. M. TYNDALL, C.B.E., D.Sc., F.R.S.

VOL. II.—EIGHTH SERIES

JANUARY—DECEMBER 1957

LONDON:

TAYLOR & FRANCIS, LTD., RED LION COURT, FLEET STREET, E.C.4.

“Meditationis est perscrutari occulta ; contemplationis est admirari
perspicua Admiratio generat quæstionem, quæstio investigationem,
investigatio inventionem.”—*Hugo de S. Victore.*

—“Cur spirent venti, cur terra dehiscat,
Cur mare turgescat, pelago cur tantus amaror,
Cur caput obscura Phœbus furrugine condât,
Quid toties diros cogat flagrare cometas,
Quid pariat nubes, veniant cur fulmina cœlo,
Quo micet igne Iris, superos quis conciat orbes
Tam vario motu.”

J. B. Pinelli ad Mazonium.

CONTENTS OF VOL. II. Nos. (13-24)

(EIGHTH SERIES)

8th ser.
v.2

NUMBER 13—JANUARY

	PAGE
The Existence of Microcracks after Cold-Work. By A. N. STROH, Physics Department, University of Sheffield	1
The Effect of Isotopic Spin Impurity on (γ , p) and (γ , n) Cross Sections. By F. C. BARKER and A. K. MANN, Research School of Physical Sciences, The Australian National University, Canberra	5
Investigation of the Annealing of Deformed Nickel Powder by X-Ray and Stored Energy Measurements. By D. MICHELL and F. D. HAIG, Division of Tribophysics, Commonwealth Scientific and Industrial Research Organization, University of Melbourne, Australia	15
A Note on Hydromagnetic Stability Problems. By R. J. TAYLER, Atomic Energy Research Establishment, Harwell, Berks.	33
Interaction Lengths and Diffraction Scattering of 4.2 gev π^- -Mesons in G5 Emulsion. By J. O. CLARKE, The Physical Laboratories, The University, Manchester, and J. V. MAJOR, Department of Physics, The Durham Colleges in the University of Durham, Durham	37
The Natural Radioactivity of Lanthanum. By R. N. GLOVER and D. E. WATT, Department of Natural Philosophy, The University, Glasgow, W.2	49
Isotopic Spin Selection Rules—IX: The 9.58 mev State of ^{16}O . By S. D. BLOOM, B. J. TOPPEL and D. H. WILKINSON, Brookhaven National Laboratory, Upton, New York	57
Isotopic Spin Selection Rules—X: The 7.18 mev State of ^{20}Ne . By B. J. TOPPEL, S. D. BLOOM and D. H. WILKINSON, Brookhaven National Laboratory, Upton, New York	61
Isotopic Spin Selection Rules—XI: The 8.06 and 6.23 mev States of ^{14}N . By D. H. WILKINSON and S. D. BLOOM, Brookhaven National Laboratory, Upton, New York	63
Isotopic Spin Selection Rules—XII: The Mirror Reactions $^6\text{Li}(d, n)^7\text{Be}$ and $^6\text{Li}(d, p)^7\text{Li}$. By D. H. WILKINSON, Brookhaven National Laboratory, Upton, New York	83
Observation of Helicoidal Dislocation Lines in Fluorite Crystals. By W. BONTINCK and S. AMELINCKX, Laboratorium voor Kristalkunde, Rozier, 6, Gent, Belgium	94
Magneto-Resistance in Metals. By D. K. C. MACDONALD, Division of Pure Physics, National Research Council, Ottawa, Canada	97
On the Mechanism of Work Hardening in Face-Centred Cubic Metals, with Special Reference to Polycrystalline Copper. By P. FELTHAM and J. D. MEAKIN, The University, Leeds	105
Electronic Subtraction of Background with a Hutchinson-Scarrott Kicksorter. By C. W. MCCUTCHEN, Cavendish Laboratory, Cambridge	113
The Effects of Incomplete Resolution on Surface Distributions Derived from Strip-Scanning Observations, with Particular Reference to an Application in Radio Astronomy. By S. F. SMERD and J. P. WILD, Division of Radiophysics, C.S.I.R.O., Sydney, Australia	119

The Nature of Persistent Slip Bands in Fatigued Copper. By D. S. KEMSLEY, Department of Supply, Aeronautical Research Laboratories, Melbourne	131
Angle Distribution by Pair Production in Photographic Emulsions. By J. P. ROALSVIG, Fysisk Institutt, University of Oslo, Norway.....	133
Correspondence :	
An Investigation of Neutron Groups from the Reaction $^{10}\text{B}(\text{d}, \text{n})^{11}\text{C}$ at 7.0 mev Deuteron Energy. By A. GRAUE and B. TRUMPY, Department of Physics, University of Bergen, Norway.....	138
Reviews of Books.....	141

NUMBER 14—FEBRUARY

The Specific Heat of Liquid Helium. By R. W. HILL and O. V. LOUNASMAA, Clarendon Laboratory, Oxford	143
^8Li Emission from Heavy Element Disintegrations Produced by 5.7 Bev Protons. By S. J. GOLDSACK, W. O. LOCK and B. A. MUNIR, Department of Physics, University of Birmingham.....	149
The Low Energy End of the Cosmic Ray Spectrum of Alpha-Particles. By P. H. FOWLER and C. J. WADDINGTON, H. H. Wills Physical Laboratory, Bristol, England and P. S. FREIER, J. NAUGLE and E. P. NEY, University of Minnesota, Minneapolis, Minnesota	157
A Simple Treatment of Meson-Nucleon Scattering. By S. F. EDWARDS and P. T. MATTHEWS, Department of Mathematical Physics, University of Birmingham	176
The Reflection and Transmission of Shock Waves—I: The Reflection of a Detonation Wave at a Boundary. By D. C. PACK, Department of Mathematics, The Royal College of Science and Technology, Glasgow ...	182
The Reflection and Transmission of Shock Waves—II: The Effect of Shock Waves on an Elastic Target of Finite Thickness. By D. C. PACK, Department of Mathematics, The Royal College of Science and Technology, Glasgow	189
A Comparison of Electron and Positron Single Scattering in Argon. By C. BOWNESS and N. CUSACK, Birkbeck College, London	196
The Elastic Scattering of Protons by Protons at 925 mev. By P. J. DUKE, W. O. LOCK and P. V. MARCH, University of Birmingham, W. M. GIBSON and J. G. McEWEN, Queen's University, Belfast and I. S. HUGHES and H. MUIRHEAD, University of Glasgow	204
The Production of π -Mesons in Proton-Proton Collisions at 925 mev. By I. S. HUGHES, P. V. MARCH, H. MUIRHEAD, University of Glasgow, and W. O. LOCK, University of Birmingham	215
Quasi-Elastic Collisions of 925 mev Protons. By J. G. McEWEN and W. M. GIBSON, Department of Physics, Queen's University, Belfast, and P. J. DUKE, Department of Physics, University of Birmingham	231
Some Remarks about Electron-Correlation. By O. KRISEMENT, British Council Fellow at the Cavendish Laboratory, University of Cambridge	245
Liquid Immiscibility in Metal Systems. By B. W. MOTT, Atomic Energy Research Establishment, Harwell	259
Correspondence :	
On the Naor Relations between Madelung Constants for Cubic Ionic Lattices. By F. G. FUMI and M. P. TOSI, Cattedra di Fisica Teorica dell'Università, Palermo, Italy.....	284

	PAGE
Isotopic Spin Impurities. By F. C. BARKER, Research School of Physical Sciences, Australian National University, Canberra ...	286
Reviews of Books	288
Corrigendum	292

NUMBER 15—MARCH

Interactions of the Heavy Nuclei of the Cosmic Radiation. By P. H. FOWLER, R. R. HILLIER and C. J. WADDINGTON, H. H. Wills Physical Laboratory, Bristol.....	293
Stability of Laminar Flow in Curved Channels. By CHIA-SHUN YIH and W. M. SANGSTER, Iowa Institute of Hydraulic Research, State University of Iowa	305
The Interpretation of the Levels of ^{19}F on the Rotational Model. By E. B. PAUL, Atomic Energy Research Establishment, Harwell	311
The Growth of Lead Nitrate Crystals from Aqueous Solution. By ANNE P. WILLIAMS, Royal Holloway College, Englefield Green, Surrey ...	317
Work-Hardening and Work-Softening of Face-Centred Cubic Metal Crystals. By A. SEEGER, J. DIEHL, S. MADER and H. REBSTOCK, Institut für theoretische und angewandte Physik der Technischen Hochschule Stuttgart, and Max-Planck-Institut für Metallforschung, Stuttgart, Germany.....	323
Intensity Fluctuations in Stationary Optical Fields. By E. WOLF, The Physical Laboratories, University of Manchester.....	351
On the Formation and Properties of Helical Dislocations. By S. AMELINCKX, W. BONTINCK, W. DEKEYSER and F. SEITZ, Laboratorium voor Kristalkunde der Rijksuniversiteit, Rozier, 6, Gent, Belgium	355
Quenching Vacancies in Gold. By F. J. BRADSHAW and S. PEARSON, Royal Aircraft Establishment, Farnborough, Hants.....	379
The Existence of a Metastable Phase Isomorphous with the Stable Phase of a Pure Metal. By J. H. O. VARLEY, Metallurgy Division, Atomic Energy Research Establishment, Harwell, Berks.....	384
The Magnetic Susceptibility of α and β Brass. By B. G. CHILDS and J. PENFOLD, Atomic Energy Research Establishment, Harwell	389
Ferromagnetism of a Gas of Hard Sphere Fermions. By JOACHIM B. EHRLMAN, Nucleonics Division, U.S. Naval Research Laboratory, Washington, D.C.....	404
Correspondence :	
The Effect of Free Electrons on Lattice Conduction at High Temperatures. By R. STRATTON, Metropolitan Vickers Electrical Co. Ltd., Manchester, 17.....	422
Reviews of Books.....	425

NUMBER 16—APRIL

The L/K-Capture Ratio of Germanium 71. By R. W. P. DREVER and A. MOLJK, Natural Philosophy Department, University of Glasgow....	427
Some Observations on the Nature of Fatigue Damage. By P. J. E. FORSYTH, Metallurgy Department, Royal Aircraft Establishment, Farnborough, Hants.	437
Ratios of Specific Heat and High-Frequency Viscosities in Organic Liquids under Pressure, derived from Ultrasonic Propagation. By E. G. RICHARDSON and R. I. TAIT, King's College, Newcastle-upon-Tyne....	441

On the Texture of Evaporated Films. By R. B. KEHOE, Physics Department, Imperial College, London.....	455
Relativistic Theory of Meson-Nucleon Scattering. By S. F. EDWARDS and P. T. MATTHEWS, Department of Mathematical Physics, University of Birmingham, England.....	467
An Analysis of the Reactions Induced in Complex Nuclei by Nucleons with Energies between 10 and 20 mev. By G. BROWN and H. MUIRHEAD, Department of Natural Philosophy, University of Glasgow.....	473
The Electronic Structure of Palladium-Uranium Alloys. By J. A. CATTERALL (Communication from the National Physical Laboratory)....	491
The γ -Rays from 8.06 mev Level in ^{14}N . By C. BROUDE, L. L. GREEN, J. J. SINGH and J. C. WILLMOTT, Nuclear Physics Research Laboratory, University of Liverpool.....	499
The Effect of Added Titanium and Aluminium on the Magnetic Behaviour of α Ferric Oxide. By G. HAIGH, Department of Physics, Imperial College of Science and Technology, London.....	505
The Thermal and Magnetic Properties of Neodymium Ethylsulphate at Low Temperatures. By HORST MEYER, The Clarendon Laboratory, Oxford	521
Nuclear Alignment of ^{147}Nd . By G. R. BISHOP, M. A. GRACE, C. E. JOHNSON, H. R. LEMMER and J. PEREZ Y JORBA, Clarendon Laboratory, Oxford	534
The Thermal Conductivity of Metals at Low Temperatures. Deviations from Ideal Behaviour. By H. M. ROSENBERG, The Clarendon Laboratory, Oxford	541
Metallography of a Medium Carbon Steel subjected to Slow and Impact Compression. By J. D. CAMPBELL, J. DUBY, Engineering Laboratory, University of Oxford and K. E. PUTTICK, H. H. Wills Physics Laboratory, University of Bristol	548
The Magnetic Properties of Alloys having the Compositions $\text{Mn}_{60}\text{Al}_x\text{Zn}_{20-x}\text{C}_{20}$ and $\text{Mn}_{60}\text{Ga}_x\text{Zn}_{20-x}\text{C}_{20}$. By L. HOWE and H. P. MYERS, Department of Mining and Metallurgy, The University of British Columbia, Vancouver, Canada	554
Climb Phenomena in Synthetic Fluorite Crystals. By W. BONTINCK, Laboratorium voor Kristalkunde, Rozier, 6, Gent, Belgium.....	561
Correspondence:	
Multipole Order of Lattice Cells of Ionic Crystals. By F. G. FUMI and M. P. TOSI, Cattedra di Fisica Teorica dell'Università, Palermo, Italy	568
Quenching Vacancies in Aluminium. By F. J. BRADSHAW and S. PEARSON, Royal Aircraft Establishment, Farnborough	570
The Influence of Retardation on the London-Van der Waals Force. By M. R. AUB, E. A. POWER and S. ZIENAU, University College, London	571
Reviews of Books	573

NUMBER 17—MAY

The Thermal and Electrical Conductivity of Chromium at Low Temperatures. By A. F. A. HARPER, W. G. R. KEMP, P. G. KLEMENS, R. J. TAINSH and G. K. WHITE, Division of Physics, Commonwealth Scientific and Industrial Research Organization, Sydney	577
On the Activation Energy of High Temperature Creep in Metals. By PAUL FELTHAM, The University, Leeds	584

	PAGE
Small Angle Scattering from Deformed Metals. By H. H. ATKINSON, Crystallographic Laboratory, Cavendish Laboratory, Cambridge and R. D. LOWDE, Metallurgy Division, A.E.R.E., Harwell, Berkshire	589
Electric Polarizability of Atoms and Molecules. By J. A. POPLE and P. SCHOFIELD, Department of Theoretical Chemistry, University of Cambridge	591
The Inter-Diffusion of Two Charged Particles (with particular reference to Ion-Exchange in Zeolites). By I. R. BEATTIE, Department of Chemistry, King's College, London and D. R. DAVIES, Department of Mathematics, The University, Sheffield	599
Irradiation Damage in Single Crystals of Magnesium Oxide. By F. P. CLARKE, Atomic Energy Research Establishment, Harwell	607
The Excitation of a 2.79 mev Level in ^{19}F by Inelastic Neutron Scattering. By JOAN M. FREEMAN, Atomic Energy Research Establishment, Harwell	628
A Study of the Growth of Crystals from Solution when Subjected to Local Deformation. By ANNE P. WILLIAMS, Royal Holloway College, Englefield Green, Surrey	635
The Thermal Expansion of Solids. By G. C. FLETCHER, Department of Mathematics, University of Exeter	639
Dislocation Locking and Fracture in α -Iron. By J. HESLOP and N. J. PETCH, Metallurgy Department, Houldsworth School of Applied Science, University of Leeds	649
The Magnetization of Cobalt-Manganese and Cobalt-Chromium Alloys. By J. CRANGLE, Physics Department, The University, Sheffield	659
Stacking Faults in Face-Centred Cubic Metals and Alloys. By R. E. SMALLMAN and K. H. WESTMACOTT, Metallurgy Division, A.E.R.E., Harwell	669
The Breakdown of Parity Conservation in the π - μ - e Decay and a Test of the Two Component Neutrino Theory. By G. B. CHADWICK, S. A. DURRANI, L. M. EISEBERG, P. B. JONES, J. W. G. WIGNALL and D. H. WILKINSON, Cavendish Laboratory, Cambridge	684
Correspondence :	
Cold Neutron Scattering in Aluminium. By L. S. KOTHARI and K. S. SINGWI, Atomic Energy Establishment, Apollo Pier Road, Bombay 1, India	694
A Search for Natural Radioactivity in Vanadium. By R. N. GLOVER and D. E. WATT, Department of Natural Philosophy, The University, Glasgow, W.2	697
A Search for Electron Capture in ^{176}Lu . By R. N. GLOVER and D. E. WATT, Department of Natural Philosophy, The University, Glasgow, W.2	699
On the Surface Free Energy and Specific Heat of a Metal. By R. STRATTON, Metropolitan Vickers Electrical Co. Ltd., Manchester, 17	702
A New Method for Decorating Dislocations in Crystals of Alkali Halides. By D. J. BARBER, K. B. HARVEY and J. W. MITCHELL, H. H. Wills Physical Laboratory, University of Bristol	704
Diffusion of Zinc in Zinc Oxide. By J. P. ROBERTS and C. WHEELER, Royal Aircraft Establishment, Farnborough, Hants	708
Circular Polarization of γ -rays : Further Proof for Parity Failure in β Decay. By H. SCHOPPER, Cavendish Laboratory, Cambridge ...	710
The Weak Lines in the Radium D Gamma Spectrum. By A. C. L. BARNARD and B. C. HAYWOOD, University of Birmingham	713
The Axial Ratio of Zinc, and of the Eta and Epsilon Brasses. By F. R. N. NABARRO, University of the Witwatersrand, Johannesburg	716

NUMBER 18—JUNE

PAGE

The Anhyseretic Magnetization of Permanent Magnet Alloys. By E. P. WOHLFARTH, Department of Mathematics, Imperial College, London	719
Magnetic Saturation in Alloys of Neodymium at Low Temperatures. By J. M. LOCK, Royal Radar Establishment, Gt. Malvern, Worcs.....	726
The Calculation of Lattice Constants in Crystal Statistics. By C. DOMB, Wheatstone Laboratory, King's College, London and M. F. SYKES, Clarendon Laboratory, Oxford	733
The Initial Stages of Growth of Thin Metal Films on a Silver Single-Crystal Substrate. By R. C. NEWMAN, Department of Physics, Imperial College, London, S.W.7	750
The Scattering of Positive Ions by Neutral Atoms. By D. W. SIDA, University College, London.....	761
Photoelastic Study of Dislocation Arrangements in Crystals. By J. F. NYE, R. D. SPENCE and M. T. SPRACKLING, H. H. Wills Physics Laboratory, University of Bristol	772
The Absorption of Slow Negative π -Mesons by the Elements in Nuclear Emulsions. By G. BROWN and I. S. HUGHES, Department of Natural Philosophy, The University, Glasgow	777
The Nuclear Photoeffect in Light Nuclei. By F. C. BARKER, Research School of Physical Sciences, Australian National University	780
A Study of Protons Emitted from Aluminium, Iron and Rhodium on Bombardment with Neutrons of 13.2 mev. By G. BROWN, G. C. MORRISON, H. MUIRHEAD and W. T. MORTON, Department of Natural Philosophy, University of Glasgow	785
Observations on Extensive Air Showers—I: Apparatus. By T. E. CRANSHAW and W. GALBRAITH, Atomic Energy Research Establishment, Harwell.....	797
Observations on Extensive Air Showers—II: Time Variations in the Energy Region of 10^{17} ev. By T. E. CRANSHAW and W. GALBRAITH, Atomic Energy Research Establishment, Harwell	804
The Specific Heats and Magnetic Susceptibilities of Alloys of Cerium with Lanthanum at Low Temperatures. By LOIS M. ROBERTS and J. M. LOCK, Royal Radar Establishment, Gt. Malvern, Worcs.	811
A Propane Bubble Chamber. By MARGARET H. ALSTON, B. COLLINGE, W. H. EVANS, R. W. NEWPORT and P. R. WILLIAMS, Nuclear Physics Research Laboratory, University of Liverpool	820
Reviews of Books	830

NUMBER 19—JULY

Crossing Symmetry and the Relativistic Equation for two Fermions. By S. F. EDWARDS and P. T. MATTHEWS, Department of Mathematical Physics, University of Birmingham.....	831
Remarks on Crossing Symmetry. By S. F. EDWARDS, Department of Mathematical Physics, University of Birmingham, England and P. T. MATTHEWS, Department of Physics, University of Rochester, Rochester, New York.....	839
The Thermal Instability of a Rotating Fluid Sphere Heated Within. By S. CHANDRASEKHAR, F.R.S., University of Chicago.....	845
The Etching of Diamonds by Low Pressure Oxygen. By M. OMAR and M. KENAWI, Physics Department, A'in Shams University, Cairo.....	859

	PAGE
The Kinetics of Colour Centre Formation in Quartz. By E. G. S. PAIGE, Royal Radar Establishment, Gt. Malvern, Worcs.	864
Observations on the Magnetic Transition in Hematite at -15°C . By G. HAIGH, Department of Physics, Imperial College of Science and Technology, London.....	877
Observations on Extensive Air Showers—III: The Distribution of Charged Particles. By T. E. CRANSHAW, W. GALBRAITH and N. A. PORTER, Atomic Energy Research Establishment, Harwell.....	891
Observations on Extensive Air Showers—IV: The Lateral Distribution of Penetrating Particles. By N. A. PORTER, T. E. CRANSHAW and W. GALBRAITH, Atomic Energy Research Establishment, Harwell.....	900
Fusion Induced by Mu-Mesons. By T. H. R. SKYRME, Atomic Energy Research Establishment, Harwell, Didcot, Berks.	910
The Production of Intense Cold Neutron Beams. By I. BUTTERWORTH, P. A. EGELSTAFF, H. LONDON and F. J. WEBB, Atomic Energy Research Establishment, Harwell.....	917
The Thermal and Magnetic Properties of Ytterbium Ethyl Sulphate between 20°K and 1°K . By A. H. COOKE, F. R. MCKIM, H. MEYER and W. P. WOLF, The Clarendon Laboratory, Oxford University.....	928
Correspondence:	
Cascade Decay of a Heavy K-Meson. By S. N. SEN GUPTA and M. S. SINHA, Bose Institute, Calcutta.....	936
Reviews of Books.....	939

NUMBER 20—AUGUST

The Effects of Radiation on the near Infra-Red Absorption Spectrum of α -Quartz. By E. W. J. MITCHELL and J. D. RIGDEN, The Physics Research Laboratory, University of Reading	941
Proportional Counter Measurements of π -Mesonic X-Rays. By D. WEST and E. F. BRADLEY, Atomic Energy Research Establishment, Harwell..	957
Surface Distributions of Dislocations in Metals: II. By C. J. BALL, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England	977
Impurity-Vacancy Interaction in a Metal. By L. C. R. ALFRED and N. H. MARCH, Department of Physics, The University, Sheffield..	985
A Graphical Method for the Determination of Half-Lives. By I. KUŠČER, M. V. MIHAILOVIĆ, Institute of Physics, Ljubljana, Yugoslavia and E. C. PARK, Department of Physics, University of Birmingham ...	998
Rectilinear Etch Pits on Diamond. By S. TOLANSKY and A. R. PATEL, Royal Holloway College, University of London, Egham, Surrey	1003
On the 8.06 and 8.70 mev States in ^{14}N . By C. BROUDE, L. L. GREEN, J. J. SINGH and J. C. WILLMOTT, Nuclear Physics Research Laboratory, University of Liverpool	1006
The Flow Stress of Polycrystalline Aluminium. By C. J. BALL, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England	1011
An X-Ray Study of Neutron Irradiated Lithium Fluoride. By R. E. SMALLMAN and B. T. M. WILLIS, Metallurgy Division, A.E.R.E., Harwell, Nr. Didcot, England	1018
Theory of Rochelle Salt. By A. F. DEVONSHIRE, H. H. Wills Physical Laboratory, Royal Fort, Bristol	1027

	PAGE
Radio Observations of the Lunar Atmosphere. By B. ELSMORE, Cavendish Laboratory, Cambridge	1040
Correspondence :	
The Etching of Dislocations in Crystals of Silver Halides. By D. A. JONES and J. W. MITCHELL, H. H. Wills Physical Laboratory, University of Bristol	1047
A Demonstration of Parity Non-Conservation in β -Decay. By M. A. GRACE, C. E. JOHNSON, R. G. SCURLOCK and C. V. SOWTER, Clarendon Laboratory, Oxford	1050
Density Change of a Crystal Containing Dislocations. By W. M. LOMER, Atomic Energy Research Establishment, Harwell, near Didcot, Berks.	1053
Reviews of Books	1055

NUMBER 21—SEPTEMBER

The Charge Distribution of Multiply Charged Nuclei in the Primary Cosmic Radiation. Part I: The Light and Medium Nuclei. By C. J. WADDINGTON, H. H. Wills Physical Laboratory, Bristol	1059
Nuclear Alignment of Ytterbium 175. By M. A. GRACE, C. E. JOHNSON, R. G. SCURLOCK and R. T. TAYLOR, Clarendon Laboratory, Oxford	1079
The 4.77 mev Level in Boron 10. By H. WARHANEK, Cavendish Laboratory, Cambridge, England	1085
K-Capture in Carbon 11. By J. SCOBIE and G. M. LEWIS, Department of Natural Philosophy, University of Glasgow	1089
Decay Effects in Barium Titanate Ceramics. By H. L. ALLSOPP, H. H. Wills Physics Laboratory, University of Bristol	1100
Observations on the Distribution of Slip in Polycrystalline Copper. By D. S. KEMSLEY, Department of Supply, Aeronautical Research Laboratories, Fishermen's Bend, Melbourne	1103
On the Longitudinal Polarization of β -particles. By P. E. CAVANAGH, J. F. TURNER, C. F. COLEMAN, G. A. GARD and B. W. RIDLEY, Atomic Energy Research Establishment, Harwell	1105
The Velocity of Sound in Metals at High Temperatures. By J. F. W. BELL, The Royal Naval College, Greenwich, S.E.10.	1113
Electron Diffraction from Crystals containing Stacking Faults: I. By M. J. WHELAN and P. B. HIRSCH, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England	1121
Polarization of μ -Mesons Observed in a Propane Bubble Chamber. By MARGARET H. ALSTON, W. H. EVANS, T. D. N. MORGAN, R. W. NEWPORT and P. R. WILLIAMS, Nuclear Physics Research Laboratory, University of Liverpool and A. KIRK, Applied Mathematics Department, University of Liverpool	1143
A Proposal for Determining the Fermi Surface by Magneto-Acoustic Resonance. By A. B. PIPPARD, Royal Society Mond Laboratory, Cambridge	1147
The Nature and Formation of the Photographic Latent Image. By J. W. MITCHELL, H. H. Wills Physical Laboratory, Royal Fort, Bristol, 8 and N. F. MOTT, Cavendish Laboratory, Cambridge.	1149
A Note on Single Crystals in Polymers: Evidence for a Folded Chain Configuration. By A. KELLER, H. H. Wills Physics Laboratory, University of Bristol	1171
Reviews of Books	1176

NUMBER 22—OCTOBER

	PAGE
Liquid \rightleftharpoons Solid Equilibrium in Copper and Silver Alloys; with an Appendix on the Equilibrium Diagram of the System Copper-Arsenic. By WILLIAM HUME-ROTHERY and JENNIFER BURNS, Department of Metallurgy, Oxford	1177
The Centre of a Dislocation: I. By ELIZABETH H. YOFFE, Cavendish Laboratory, University of Cambridge.....	1197
Photodisintegration of the Alpha Particle. By B. H. BRANSDEN and A. C. DOUGLAS, Department of Natural Philosophy, University of Glasgow and H. H. ROBERTSON, CERN, European Organization for Nuclear Research, Geneva.....	1211
Nuclear Forces and the Structure of the Lithium Isotopes. By J. M. SOPER, Cavendish Laboratory, Cambridge.....	1219
Electrostatic Fields round Localized Defects in Metals. By P. M. LEE and N. H. MARCH, Department of Physics, The University, Sheffield	1226
On the Mechanism of Work Hardening in Face-Centred Cubic Metals with Special Reference to Polycrystalline Copper: II. By P. FELTHAM and J. D. MEAKIN, The University, Leeds.....	1237
The Atomic Heats of Titanium, Zirconium and Hafnium. By N. M. WOLCOTT, Clarendon Laboratory, Oxford, England.....	1246
The Angular Correlation of the Gamma Cascade in Sulphur 34. By P. S. FISHER and G. G. SHUTE, Department of Physics, University of Birmingham.....	1255
Helical Dislocations and Spiral Etch-Pits. By S. AMELINCKX, W. BONTINCK and W. DEKEYSER, Laboratorium voor Kristalkunde, Rozier, 6, Gent, Belgium.....	1264
The Hardening and Embrittlement of Steel by Irradiation with Neutrons. By A. T. CHURCHMAN, Associated Electrical Industries Limited, Aldermaston and I. MOGFORD and A. H. COTTRELL, Atomic Energy Research Establishment, Harwell.....	1271
On the Electronic Conductivity of Crystals of Silver Halides. By J. W. MITCHELL, H. H. Wills Physical Laboratory, University of Bristol	1276
The Thermal Instability of a Rotating Fluid Sphere Heated Within: II. By S. CHANDRASEKHAR, F.R.S., University of Chicago.....	1282
Correspondence:	
On Spiral Etch Pits in Germanium and Silicon. By S. G. ELLIS, RCA Laboratories, Princeton, New Jersey.....	1285
Reviews of Books.....	1286

NUMBER 23—NOVEMBER

Magnetohydrodynamic Shock Waves in the Solar Corona, with Applications to Bursts of Radio-frequency Radiation. By K. C. WESTFOLD, Department of Applied Mathematics, University of Sydney	1287
Electron Diffraction from Crystals Containing Stacking Faults: II. By M. J. WHELAN and P. B. HIRSCH, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England	1303
Delayed γ -Ray Angular Correlations in Tantalum 181. By R. E. AZUMA and G. M. LEWIS, Department of Natural Philosophy, The University, Glasgow	1325
The Remanent Magnetization of Single Domain Ferromagnetic Particles. By E. P. WOHLFARTH and D. G. TONGE, Department of Mathematics, Imperial College, London	1333

The Solution of Inert Gas Atoms in Metals. By D. E. RIMMER and A. H. COTTRELL, Atomic Energy Research Establishment, Harwell....	1345
Indium-rich Indium-Magnesium and Indium-Lithium Alloys. By J. GRAHAM and G. V. RAYNOR, Department of Physical Metallurgy, University of Birmingham	1354
The Band Structure of the Transition Metals. By N. F. MOTT, Cavendish Laboratory, Cambridge, and K. W. H. STEVENS, University of Nottingham.....	1364
Correspondence :	
Quenching Vacancies in Dilute Binary Platinum Solid Solutions. By S. PEARSON and F. J. BRADSHAW, Royal Aircraft Establishment, Farnborough	1387
Energy Determination of Electromagnetic Cascades in Nuclear Emulsions. By K. PINKAU, H. H. Wills Physical Laboratory, University of Bristol	1389
Hall Effect and Magneto-resistance in Indium-Antimonide. By GASTON FISCHER and D. K. C. MACDONALD, National Research Council, Ottawa, Canada	1393
Reviews of Books	1396
Erratum	1396

NUMBER 24—DECEMBER

Optical Absorption Lines of Hydrated Manganous Salts at Low Temperatures. By R. PAPPALARDO, H. H. Wills Physics Laboratory, Bristol	1397
Specific Heat of Solids at High Temperatures. By J. N. EASTABROOK, Royal Aircraft Establishment, Farnborough, Hampshire	1415
Thermal Expansion of Solids at High Temperatures. By J. N. EASTABROOK, Royal Aircraft Establishment, Farnborough, Hampshire	1421
The Internal Friction of Cold-Worked Copper at Low Temperatures. By D. H. NIBLETT and J. WILKS, Clarendon Laboratory, Oxford.....	1427
Structural Behaviour of Neutron Irradiated Quartz. By M. C. WITTELS, Solid State Division, Oak Ridge National Laboratory, Oak Ridge, Tennessee, United States	1445
Thermoelectric Power of Ionic Conducting Crystals. By R. E. HOWARD, Clarendon Laboratory, Oxford and A. B. LIDIARD, Atomic Energy Research Establishment, Harwell, Berkshire	1462
Lifetime of the 3.56 mev State of Lithium 6. By H. J. ROSE and E. K. WARBURTON, Brookhaven National Laboratory, Upton, New York	1468
Scattering of Polarized Positrons by Polarized Electrons. By J. M. C. SCOTT, Cavendish Laboratory, Cambridge	1472
On the Mechanical Properties of Indium Antimonide. By J. W. ALLEN, Services Electronics Research Laboratory, Baldock, Herts.	1475
Correspondence :	
Electron Microscopic Observation of Periodic Structures below 10 Å. By G. A. BASSETT and J. W. MENTER, Tube Investments Research Laboratories, Hinxton Hall, Cambridge	1482
Subject Index	1485
Index of Authors (with Titles)	1489
List of Contents	iii
List of Plates	xiii

PLATES

1. Illustrative of W. BONTINCK and S. AMELINCKX's Paper on Observation of Helicoidal Dislocation Lines in Fluorite Crystals.
2. Illustrative of D. S. KEMSLEY's Paper on The Nature of Persistent Slip Bands in Fatigued Copper.
3. Illustrative of P. J. DUKE *et al.*'s Paper on The Elastic Scattering of Protons by Protons at 925 mev.
- 4 & 5. Illustrative of ANNE P. WILLIAMS's Paper on The Growth of Lead Nitrate Crystals from Aqueous Solution.
- 6-9. Illustrative of A. SEEGER *et al.*'s Paper on Work-Hardening and Work-Softening of Face-Centred Cubic Metal Crystals.
10. Illustrative of S. AMELINCKX *et al.*'s Paper on The Formation and Properties of Helical Dislocations.
- 11 & 12. Illustrative of P. J. E. FORSYTH's Paper on Some Observations on the Nature of Fatigue Damage.
- 13 & 14. Illustrative of R. B. KEHOE's Paper on The Texture of Evaporated Films.
- 15-18. Illustrative of J. D. CAMPBELL *et al.*'s Paper on Metallography of a Medium Carbon Steel subjected to Slow and Impact Compression.
- 19-21. Illustrative of W. BONTINCK's Paper on Climb Phenomena in Synthetic Fluorite Crystals.
- 22 & 23. Illustrative of ANNE P. WILLIAM's Paper on A Study of the Growth of Crystals from Solution when Subjected to Local Deformation.
- 24 & 25. Illustrative of D. J. BARBER *et al.*'s Paper on A New Method for Decorating Dislocations in Crystals of Alkali Halides.
- 26 & 27. Illustrative of R. C. NEWMAN's Paper on The Initial Stages of Growth of Thin Metal Films on a Silver Single-Crystal Substrate.
- 28 & 29. Illustrative of J. F. NYE *et al.*'s Paper on Photoelastic Study of Dislocation Arrangements in Crystals.
- 30 & 31. Illustrative of MARGARET H. ALSTON *et al.*'s Paper on A Propane Bubble Chamber.
- 32-35. Illustrative of M. OMAR and M. KENAWI's Paper on The Etching of Diamonds by Low Pressure Oxygen.
36. Illustrative of S. N. SEN GUPTA and M. S. SINHA's Paper on Cascade Decay of a Heavy K-Meson.
- 37 & 38. Illustrative of S. TOLANSKY and A. R. PATEL's Paper on Rectilinear Etch Pits on Diamond.
- 39 & 40. Illustrative of D. A. JONES and J. W. MITCHELL's Paper on The Etching of Dislocations in Crystals of Silver Halides.
- 41 & 42. Illustrative of A. L. ALLSOPP's Paper on Decay Effects in Barium Titanate Ceramics.

43. Illustrative of D. S. KEMSLEY's Paper on Observations on the Distribution of Slip in Polycrystalline Copper.
- 44-47. Illustrative of A. KELLER's Paper on A Note on Single Crystals in Polymers.
48. Illustrative of S. AMELINCKX's Paper on Helical Dislocations and Spiral Etch-Pits.
- 49-54. Illustrative of M. J. WHELAN and P. B. HIRSCH's Paper on Electron Diffraction from Crystals Containing Stacking Faults.
- 55-58. Illustrative of R. PAPPALARDO's Paper on Optical Absorption Lines of Hydrated Manganous Salts at Low Temperatures.
59. Illustrative of M. C. WITTELS's Paper on The Structural Behaviour of Neutron Irradiated Quartz.
60. Illustrative of J. W. ALLEN's Paper on The Mechanical Properties of Indium Antimonide.
61. Illustrative of G. A. BASSETT and J. W. MENTER's Paper on Electron Microscopic Observation of Periodic Structures below 10 Å.
